

# AI Practical Uses for Public Works Webinar

January 21, 2027

9:00 AM - 10:30 AM EDT

*Presented by Marilee Enus, Director  
University of New Hampshire T2 Center*

---

This webinar will introduce local government and public works professionals to the practical uses of AI tools for everyday workplace tasks – no technical background required. Whether you're brand new to AI or have already experimented a bit, you'll walk away with concrete ideas, smarter prompting strategies, and a clearer sense of where AI fits – and where it doesn't – in your workflow.

## Learning Objectives

- ✓ Identify common generative AI tools and their appropriate use cases
- ✓ Apply effective prompting strategies to drafting and summarizing tasks
- ✓ Describe ethical and policy considerations for AI use in local government
- ✓ Evaluate AI outputs critically and apply appropriate human oversight
- ✓ Develop a practical approach for getting started with AI in your own agency

## Intended Audience

Anyone working in local road agencies, engineering and planning consultants, and public works personnel.

## Registration

This webinar is being offered free-of-charge, but pre-registration is required.
