

Excavation & Trenching Safety

Virtual Class (Roads Scholar I - Must attend both days for RS I credit.)

April 21-22, 2021 • 10AM to Noon (Both Days)

or

May 12-13, 2021 • 10AM to Noon (Both Days)

Bruce Drewes, Instructor

This is a comprehensive training program developed to educate on the hazards found in trench and excavation work in the transportation construction industry.

Class Objectives

- Identify basic hazards associated with trenching and excavation
- Explain how protective systems work and how they protect workers
- Describe inspection requirements, duties of the “Competent Person” and other safety considerations in trenching and excavation

Audience

The target audience is anyone in public works, including, but not limited to, managers, supervisors, and laborers.

Equipment Requirements

For this class, we are requesting that participants be in view of a webcam and be able to verbally ask questions. Attendees can watch together as a group, sharing a webcam (following your agency's COVID protocols). If you do not have a microphone, the Zoom information will include a call-in phone number.

Registration

These sessions will be conducted virtually through Zoom at no charge. However, pre-registration via the Zoom link is required. Since each class is limited to 40 attendees, your registration will not be immediately approved. Once approved, you will receive the registration link that will allow you to access the class. Please email Kim at kim.carr@mail.wvu.edu if you register and are no longer able to attend.
